Throughout the years Direct Imports UK has rapidly grown in the chemical industry. Currently, we fill over 2 million litres of finished product in house every year. Our automated filling machines give us the capability to adapt custom lines tailored for you.

Our in house graphic designer is able to provide and create any bespoke labels for all detergents and liquids we have to offer. All orders placed are printed to order giving you the best quality finish available. All labels are coated with a gloss finish making your product and company stand out in any outlet.

In order to provide the best possible service, we've invested heavily in state of the art machinery and robotics. This ensures our teams ability to dispatch any order within a 48 hour period or a next day service upon request. Our robotic labelling conveyer works to provide the best possible finish on all of our labelled products.

Our robot is designed and programmed to place all boxes safely and exactly so they arrive with you in excellent condition. Due to our robots precision and accuracy we can label, box and palletise a full pallet of chemicals in just 10 minutes.

Efficiency and quality of service is crucial in our industry. Our facilities are able to guarantee and provide any company throughout the UK, Ireland and Europe a level of service only a very few can offer. So now you've seen our operation, let us give you the products and service you expect.
